Title Biology of Development

Transcript Title Biology of Development

Effective Term **Spring 2019**

Catalog Description A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics.

Prerequisites BIOL 350 **and** BIOL 416 or consent of the instructor.

Cross Listed Courses:

Credits 3

Course Type Lecture (Regularly scheduled academic course) (LEC)

Grading Basis A-D(+/-)FI (G11)

Is this course part of the University Honors Program? No

Are you proposing this course for KU Core? No

Typically Offered Only Fall Semester

Repeatable for credit? No

Principal Course Designator

Course Designator N - Natural Sciences

Are you proposing that the course count towards the CLAS BA degree specific requirements?

**No**

Will this course be required for a degree, major, minor, certificate, or concentration?

**No**

Rationale for Course Proposal Students need exposure and content understanding in both genetics (BIOL 350) and cell biology (BIOL 416 Cell Structure and Function) in order to succeed in this course. Adding BIOL 416 as a prerequisite is critical to student success in BIOL 417.

Title Introduction to Neurobiology  
 Transcript Title Introduction to Neurobiology  
 Effective Term **Spring 2019**

Catalog Description Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders.

Prerequisites BIOL **350 and BIOL 416** ~~150~~ or **consent of the instructor.** ~~BIOL 151-~~Cross Listed

Rachel Schwien (rschwien):  
Approved for CUSA Subcommittee

(BIOL-BS) Biology, B.S.

Describe how:

**This course is already a requirement for these degree. We are only changing the course prerequisites.**

Rationale for  
Course Proposal

To be successful in this course, students must have foundational information beyond BIOL 150 or BIOL 151. The necessary preparation will come from successfully completing BIOL 350 Principles of Genetics and BIOL 416 Cell Structure and Function.

Rachel Schwien (rschwien):  
Approved for CLAS Undergraduate Program and Course Coordinator
- 05/01/18 2:55 pm  
Rachel Schwien (rschwien):  
Approved for CUSA Subcommittee

Describe how:

**UKanTeach certificate program is affected (not B.A. Biology as selected above-- that was just selected so that an error message wouldn't prevent this from going through). Maybe I missed it, but I don't think the UKanTeach certificate is included in the program code dropdown menu.**

**BIOL 598 is a course requirement for the UKanTeach certificate program.**

**Rationale for  
Course Proposal**

The revised course description better reflects the current course content and the direction of the course. Because the course is required for UKanTeach science students, they're given enrollment priority, but the course is also suitable and advantageous for other STEM students.

Title	Macroeconomics
Transcript Title	Macroeconomics
Effective Term	<b>Spring 2019</b>

Catalog Description The theory of national income and employment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy.

Prerequisites ECON **142**, **ECON 144**, ~~142~~ and (**MATH 116**, **MATH 126**, or equivalent) ~~ECON 144~~.

Cross Listed Courses:

Credits	3
Course Type	Lecture (Regularly scheduled academic course) (LEC)
Grading Basis	A-D(+/-)FI (G11)
Is this course part of the University Honors Program?	No
Are you proposing this course for KU Core?	No
Typically Offered	
Repeatable for credit?	No

Principal Course Designator

Course Designator S - Social Sciences

Are you proposing that the course count towards the CLAS BA degree specific requirements?

**No**

Will this course be required for a degree, major, minor, certificate, or concentration?

**No**

Rationale for Course Proposal This proposal adds the prerequisite of Calculus II. Intermediate Macroeconomics, along with Intermediate Microeconomics, serve as the two primary required courses in the middle of the economic department's curriculum. Intermediate Microeconomics already requires Calculus II. This proposal puts these two courses on equal footing.

Title Economic Growth

Transcript Title Economic Growth

Effective Term **Spring 2019**

**Catalog Description** This course studies growth with an emphasis on national evidence and macroeconomic policy issues. Classic and modern growth theories are developed and evaluated on the basis of how well they fit empirical evidence.

Theories are developed in which productivity growth results from endogenous changes in technology or in the efficiency with which factors are utilized. The fundamental factors that affect productivity are examined, and they may include government policies, income inequality, geography, climate, resources and other factors.

**Prerequisites** **ECON 522 and (MATH 116, MATH 126, or equivalent).** ~~ECON 522.~~

## History

1. May 19, 2016 by Mike Wuthrich (f409w960)

Are you proposing that the course count towards the CLAS BA degree specific requirements?

No

Will this course be required for a degree, major, minor, certificate, or concentration?

No

**Rationale for Course Proposal** We have updated the description to be more clear about the normal components of the course. We also do not have the infrastructure for the burgeoning demand for the credits and are now forced to restrict it to our majors and minors only.
